

Pro-Clear Ultimate

Long lasting protection to natural stone and feature brickwork

Pro-Clear Ultimate is a transparent exterior coating, designed to give long lasting protection to natural stone, feature brickwork and roof tiles, without changing their appearance. The single component silane-siloxane system penetrates into exterior building surfaces and chemically bonds to produce a water repellent lining.

The Benefits of Pro-Clear Ultimate

Fully Breathable – allows water vapour to pass out through the property's exterior walls.

Protects surfaces against destructive effects of air pollution, mould, algae and adverse weather conditions.

Independent testing on active ingredients shows high reductions in water adsorption, excellent breathability and durability. U.S. test method ASTM C 666 result, Durability factor 139%

Water Resistant

Weatherproof & Breathable

Mould Resistant

Does not affect surface appearance

Long Lasting

Resists the destructive effects of air pollution

Pro-Clear Ultimate

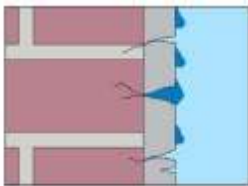

The technology

Pro-Clear Ultimate protects surfaces from the destructive effects of air pollution, mould, algae and adverse weather conditions.

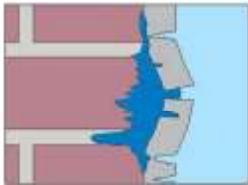

Pro-Clear Ultimate is not a water-proof barrier, but it is both weatherproof and breathable, allowing water vapour to pass out through the property's exterior walls without letting water penetrate.

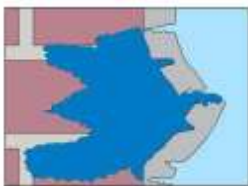

Protection against penetrating rain

1 Rain quickly penetrates weathered brick, stone and render. In winter it freezes, expands and causes cracks. These cracks are usually expensive to repair, and the more rain that gets in, the bigger the problem becomes.

2 The bigger the problem becomes, the more costly the repair and maintenance becomes. The more rain that penetrates, the greater the risk of internal damp. Large amounts of energy (heating) are then required to dry the walls.

3 Long-term penetrating damp can create unpleasant mould growth, both inside and outside the home and could ultimately lead to structural problems.

Pro-Clear Ultimate significantly reduces the absorption of water and water-borne contaminants whilst allowing the substrate to continue to breathe. Pro-Clear Ultimate will leave most substrates unstained and has excellent resistance to UV light and weathering.
