

Cleargard

A clear protective coating for exterior walls

Cleargard protects surfaces from the destructive effects of air pollution, mould, algae and adverse weather conditions. Cleargard is a masonry crème that is both weatherproof and microporous, allowing water vapour to pass out through the property's exterior walls without letting water penetrate.

The Benefits of Cleargard

Water Resistant

Odourless

Minimises Efflorescence

Improved Thermal Efficiency

Mould Resistant

Does not effect surface appearance

Andura Cleargard

Andura Cleargard is a high quality, speciality product, based on a mixture of silane and siloxane, for hydrophobic impregnation of absorbent neutral to low alkaline mineral substrates.

Protection against penetrating rain

1 Rain quickly penetrates weathered brick, stone and render. In winter it freezes, expands and causes cracks. These cracks are usually expensive to repair, and the more rain that gets in, the bigger the problem becomes.

2 The bigger the problem becomes, the more costly the repair and maintenance becomes. The more rain that penetrates, then greater the risk of internal damp. Large amounts of energy (heating) are then required to dry the walls.

3 Long-term penetrating damp can create unpleasant mould growth, both inside and outside the home and could ultimately lead to structural problems.
